Prostate Cancer

LeAnn B. Norris and Jill M. Kolesar

LEARNING OBJECTIVES

On completion of the chapter, the reader will be able to:

1. List the risk factors associated with the development of prostate cancer.
2. Compare placebo versus finasteride for the prevention of prostate cancer.
3. Recommend an initial treatment for prostate cancer on the basis of stage, Gleason score, prostate-specific antigen (PSA), patient age, and symptoms.
4. Select an initial and secondary hormonal manipulation for newly diagnosed advanced prostate cancer.
5. Understand the role of chemotherapy and immunotherapy in the treatment of metastatic castrate-resistant prostate cancer.
